Academic Heraldry

The history of academic heraldry reaches back into the early days of the university. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. In England, in the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, which may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until later replaced by the skull cap and eventually by academic caps. Both Cambridge and Oxford have made academic dress a matter of university control to the inclusion of even its minor details; and in Laudian days in Oxford, any tailor who changed the authorized design "even by a nail's breadth" was punished by the vice-chancellor of the University. When American colleges and universities desired to adopt some suitable system of academic apparel, it seemed best to agree on a system which all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted.

Gowns

The academic gown for the bachelors degree has pointed sleeves and is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. The gown is so designed to be worn open or closed. The gown for the doctors degree has bell-shaped sleeves and may be worn open or closed.

Colors

For all academic purposes, including trimmings of doctoral gowns, edging of hoods, and tassels of caps, the colors associated with the different academic disciplines are as follows:

Agriculture	Maize
Business	Drab
Education	Light Blue
Family Life	Maroon
Engineering	Orange
Humanities, Arts and Social Sciences	White
Natural Resources	Russett
Science	Gold-Yellow

School of Graduate
Studies (EdD, PhD) Gold

The white ribbon with the Greek Key on the robe of a graduate identifies an inductee into Phi Kappa Phi, the National Scholastic Society. Those wearing gray collars are Mortar Board Senior Honor Society members, the National and Academic & Service Society. A gold braided cord draped over the cowl will distinguish a graduate of Honors.

Hoods

Academic hoods are worn by recipients of advanced degrees. The master degree hoods are three-and-one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide and five inches wide for the masters and doctors degree, respectively.

Caps

Academic caps come in two forms: the traditional mortarboard (from Oxford), a square cap; and a soft cap which resembles an oversized beret (the Cambridge model). The mortarboard, used by Utah State University, is worn with a tassel. Black tassels designate any degree; colored tassels designate major field of learning, and gold tassels indicate doctors and governing officials of institutions.

Academic Procession

The commencement procession originates at Old Main and the line of march extends out the new East Wing across the quad to the Library then north to the Spectrum. The procession is composed of three divisions: (1) color guard, University president, Regents and the Board of Trustees, administrative officers, and special guests; (2) the faculty; and (3) candidates for degrees, with candidates for advanced degrees in the lead and others in groups according to the degrees for which they are candidates. The procession will stop at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

Commencement Speaker Honorary Degree

E. J. (Jake) Garn

has been a dedicated public servant of the people of Utah for nearly three decades. □ His political career began with election as Salt Lake City commissioner and then mayor. Elected to the United States Senate in 1974, he won two additional terms with the largest margins in a statewide political race in Utah history. He chaired the Senate Banking, Housing and Urban Affairs Committee and served as its ranking Republican member. The Senate Appropriations Committee and Senate Rules Committee benefitted from his skills, as did numerous important subcommittees. □ In April, 1985, he flew as a payload specialist aboard the space shuttle Discovery. The seven-day shuttle flight was the culmination of a love of aeronautics that began in childhood and included being a U.S. Navy pilot and a member of the Utah Air National Guard. □ Retired from the Senate, he is currently vice chairman of the Huntsman Chemical Corporation and serves on the boards of Franklin Quest and Intermountain Health Care. □ Jake Garn has long been an advocate for people and programs at Utah State University, and last year the Alumni Association named him an Honorary Alumnus. His sustained support has resulted in securing vital funding for research and new buildings at the university. □ For his commitment to the state, its people and the university, Utah State University proudly confers on Jake Garn the honorary degree, DOCTOR OF POLITICAL SCIENCE AND AEROSPACE STUDIES.

Honorary Degree

Royce S. Bringhurst

is an emeritus professor in the Department of Pomology at the University of California, Davis. □ A graduate of Utah State Agricultural College in 1947, he received his masters and PhD degrees at the University of Wisconsin. □ His work in genetics of small fruits has earned him widespread recognition as the world's premier strawberry breeder. During his 39 years as a member of the faculty of the University of California, Davis, his innovative and productive efforts developed about 30 strawberry varieties, some of them yielding 40 to 60 tons per acre in a single year. This work has made California the most important strawberry producing area in the world. His varieties have also been pivotal to the success of strawberry producers in Italy, Spain, France, Israel, Mexico, Chile and New Zealand. □ In addition to his exceptional work as a strawberry breeder, Dr. Bringhurst's wide research interests provide a better understanding of many other aspects of this crop, such as seed viability, transmissions of diseases and disease resistance. / He has won many honors for his scientific achievements, among them the Wilder Medal of the American Pomological Society and the Outstanding Researcher award from the American Society for Horticultural Science. □ It is with great pride Utah State University confers on Royce S. Bringhurst, the honorary degree, DOCTOR OF AGRICULTURAL SCIENCES.

Honorary Degree

William Rolfe Kerr

began his prominent and energetic association with higher education at Utah State University, where he led both the student body and the football team. □ Since entering USU's freshman class nearly 40 years ago, Dr. Kerr has seldom veered far from the halls of higher education. □ After earning his doctorate at the University of Utah, he was coordinator of student government at Utah State, dean of men at Weber State, and assistant dean of students at the University of Utah. Returning to Utah State University, he was assistant to the president for university relations until he was named president of Dixie College. □ Four years in that role and five years as executive vice president of Brigham Young University concluded Dr. Kerr's preparation to become commissioner of the Utah System of Higher Education. □ During his eight years at the helm of higher education in the state, Dr. Kerr also influenced higher education nationally. He was chairman of the Western Interstate Commission for Higher Education in 1988, and national president of the State Higher Education Executive Officers Association in 1990-91. □ For his steadfast watch over the education of Utah's brightest minds, Utah State University confers upon William Rolfe Kerr, with profound appreciation, the honorary degree of DOCTOR OF EDUCATION.

Honorary Degree

*J*ay H. Price, Jr.

is the kind of selfless individual who brings new meaning to philanthropy. □ Forsaking repose when he retired as a partner with the accounting firm of Arthur Andersen, Price chose instead to become a teacher. Utah State University has benefitted from Price's decision. For the past three years, USU students have been the beneficiaries of his talent and experience. Further, he chose to pass on his wisdom without compensation. □ During his career, Price's expertise in public utility accounting was sought by others in the profession, various utility regulatory commissions and the U.S. Congress, each of which called him as an expert witness. He has been widely regarded for his ability to reduce complex technical issues to understandable terms. □ Jay Price has been active in the American Association of Certified Public Accountants and as a member of the Financial Accounting Standards Board. □ He has also given considerable time to the YMCA and his church. He has provided support to five universities including USU and his alma mater, the University of Wisconsin, and has helped several young people attend college. He is active with the Art Institute of Chicago and the Chicago Historical Society. □ For his self-sacrificing commitment to students and the future, Utah State University proudly confers upon Jay H. Price, Jr. the honorary degree, DOCTOR OF ACCOUNTING.

Honorary Degree

Terry Smith

has had an extraordinary impact on geography education in the United States, and particularly at Utah State University and in the State of Utah. □ The current executive director of the National Geographic Society Education Foundation has been responsible for promoting geographic education and developing a network of alliances funded through the Society. One of those is the Utah Geographic Alliance. Grants and support have been available through the foundation to eradicate geographic illiteracy and to promote Utah teacher training in that field. □ As a member of the USU College of Natural Resources National Advisory Board, Terry Smith exhibits diligence and great mental acumen. □ He brings a wealth of experience in state-federal management and public finance issues. These resulted from his service as staff director for a major committee serving the National Governors' Association and from providing staff support to the Council of State Governments. He has brought an invaluable perspective to the College of Natural Resources Advisory Board, and has played a direct role in helping shape the new graduate degree program in geography and earth resources. □ Utah State University proudly awards Terry Smith the honorary degree, DOCTOR OF GEOGRAPHY AND EARTH RESOURCES.

D. Wynne Thorne Research Awards

James P. Shaver

has provided in his research theoretical and practical direction to educators concerned with fostering the values of a democratic society. □ His national recognition was exemplified by the National Council of Social Studies' appointment of James P. Shaver as editor of the Handbook of Research on Social Studies Teaching and Learning. This honor is reserved for an individual who is both distinguished as a researcher, and is considered by the national social studies research community the person most qualified to synthesize this complex and vital area of research. □ Dr. Shaver is highly regarded as a mentor of some of USU's most successful doctoral students, an instructor of research methodology, and an administrator who has guided the development of USU's nationally recognized educational research programs. His books, journal articles, and leadership roles with the most prestigious journals and professional societies all attest to James P. Shaver's exceptional productivity as a researcher and scholar. Dr. Shaver received his Bachelors Degree from the University of Washington, and his Doctorate from Harvard University. □ Utah State University recognizes excellence in designating James P. Shaver recipient of the D. Wynne Thorne Research Award.

Allan J. Steed

has played a commanding role in the measurement of upper atmospheric phenomenology using a host of sophisticated ground based, airborne, rocketborne and orbital instruments. □ Under his inspired direction, Utah State University's Space Dynamics Laboratory (SDL) has produced a series of increasingly advanced, cryogenically-cooled infrared sensors which lead the world in state-of-the-art remote sensing technology. These instruments include a rapid-scan spectrometer, a field-widened interferometer spectrometer, and interferometer/spectrometer/radiometer instrumentation for a series of highly successful infrared rocket and space shuttle borne sensors. Analysis of the data produced by these instruments has led to very significant revisions of upper atmosphere phenomenology models. □ Dr. Steed presently directs a vigorous research staff of more than 200 scientists, engineers and technicians with an annual budget of \$30 million. □ He received his BS, MS, and PhD degrees from Utah State University. He aggressively promotes and assists the development of space engineering curricula in the Departments of Electrical and Mechanical and Aerospace Engineering and currently teaches a graduate course in Optical Instrument Engineering. □ In recognition of his preeminent contributions to the field of upper atmospheric research, Utah State University designates Allan Joseph Steed as the recipient of the D. Wynne Thorne Research Award for 1993.

E. G. Peterson Extension Award

Clell V. Bagley

is the Utah State University Extension Veterinarian and a professor in the Animal, Dairy and Veterinary Sciences Department. □ Considered one of the finest Extension veterinarians in the United States, Dr. Bagley works tirelessly in helping Extension agents and animal producers control or eradicate costly animal diseases. He has the ability to identify problems facing the livestock, dairy and sheep industries and mobilize the resources available to solve them. Producers in every part of the state express appreciation for the help Dr. Bagley gives them. □ He has also provided valuable time to the veterinary profession, including serving as president of the Utah Veterinary Medical Association. He is a prolific writer, producing a monthly newsletter and contributing to Extension educational material and peer-reviewed scientific publications. He has written more than 350 Extension articles, fact sheets, newsletters and news articles. □ For his sage guidance and dependable service to USU Extension and to the people of Utah, Utah State University honors Clell V. Bagley with the 1993 E.G. Peterson Extension Award.

Eldon J. Gardner Teaching Award

Eugene C. Kartchner

joined the faculty of Utah State University twenty-eight years ago with a joint appointment in the Departments of Business Administration and Computer Science after twenty years experience in the private sector, government, and the military service. He continues to interface with the business community in order to insure that classroom experiences are relevant to the real world. □ His students consistently give him high teacher evaluations while requiring high standards of performance. □ He is known for his caring attitude toward students, holding frequent extra help sessions and practicing an open-door office policy because of his consistent desire to be an excellent teacher. □ He has been very involved with the General Education component of the student's education. He has served on the General Education Committee Board for many years. In 1992 he received an award for his active involvement in creating and shaping the LASP program. □ His business simulation is an integral component of the annual Utah business Week. This program has brought over two hundred and twenty high school students from eighty-seven Utah high schools to our campus for the past thirteen years to teach them the principals of the free enterprise economic system we enjoy. □ He received a BS in Engineering Physics and a BS in Business Administration from the University of Colorado, an MBA from the University of Utah and a PhD from the University of Washington. □ For outstanding teaching, Utah State University is pleased to present the Eldon J. Gardner Teaching Award to Eugene C. Kartchner.

Teaching Excellence Awards

Through an extensive selection process involving both students and faculty in the various academic colleges, eight members of the faculty have been designated for special recognition for excellence in teaching representing the eight colleges of the University: Agriculture; Business; Education; Engineering; Family Life; Humanities, Arts and Social Sciences; Natural Resources; and Science. From among the eight, the Eldon J. Gardner University Teaching Award recipient is chosen; the seven remaining follow:

College of Agriculture

Craig D. Aston

joined the faculty at Utah State University in 1983. He directs and teaches in the Associate of Applied Science Ornamental Horticulture Program, which enrolls 80 students on the Logan campus and at the USU Farmington Botanical Gardens. He has also been instrumental in extending the program to the Red Butte Gardens in Salt Lake City and to Provo. Craig usually teaches a minimum of thirty-six credit hours each year, and taught fifty credits on and off campus last year. His innovative approach to teaching illustrates his belief in coupling theoretical principles with hands-on experience in the horticulture industry. Students operate a greenhouse and grow and sell plants, a venture that provides fifty percent of the funds necessary to operate the greenhouse. Craig is admired and respected by his students, as is evident in the consistently high evaluations he receives and by his selection as the 1991 College of Agriculture Advisor of the Year. He received his BS and MS degrees from Utah State University.

College of Education

Ronald K. Drickey

has had a positive impact on the teacher preparation program at Utah State University since his appointment in 1987. In the six years Ron has been at USU he has been selected by students in the department as the Teacher of the Year for the Secondary Education Department two different times, as well as "Top Prof" by Mortar Board. One of his main assignments is teaching a class called Teaching Skills. He teaches this class by modeling the very teaching skills that have led to the recognition by students and members of the faculty, that Ron epitomizes excellent teaching. A former colleague put it this way. "Observing Ron teach was a joy. In his gentle, persistent way, he surprised students with the profound understanding he extracted from them about teaching and learning; the 'aha' experience he engendered was deeply satisfying as he helped students see how much they were capable of achieving." Ron is committed to justice, human dignity, and the recognition that we all have special needs. He lives by these commitments in his daily interactions with those around him, as well as, his interactions with students in his classes.

College of Engineering

Loren R. Anderson

is a Utah State University BS and PhD graduate, who left a private engineering firm to return to USU in 1971 due to his love of teaching. His many students have been the benefactors as Dr. Anderson year after year ranks among the top teachers in the college. He brings to the classroom a unique blend of technical knowledge, practical application, enthusiasm and humor. His students are challenged to acquire tools and skills that they will be able to use and apply throughout their professional careers. It is especially noteworthy that Dr. Anderson has maintained his exceptionally high-quality teaching while serving in important administrative positions such as Department Head and Associate Dean over the last ten years. In addition, he carries an active funded research program where he also emphasizes teaching his students a critical part of the research process. Dr. Loren Anderson is one who is truly committed to teaching students the engineering and personal skills to benefit them and society as a whole.

College of Family Life

Brent C. Miller

joined the faculty at Utah State University in 1979. As a professor in the Department of Family and Human Development, he is known for his personable yet challenging teaching style. His varied teaching roles include large general education classes, upper division courses, and graduate courses for masters and doctoral students. In large undergraduate courses he usually learns each person's name, moderates panels of diverse guests, and encourages students to think and to write analytically, about their own family experiences. Publishing widely and directing research projects, he is an especially effective mentor for graduate students. He is the author of several books and more than seventy professional articles, many of them coauthored with students. Graduate students especially value his suggestions for revising their written work. Beginning in the 1980s, he was elected Publications Vice President, Program Vice President, and in 1991-92 President of the National Council on Family Relations, the premier professional society for family educators and scholars.

College of Humanities, Arts and Social Sciences

Frances Titchener

has a joint appointment in the Department of History and in the Department of Languages and Philosophy. She brings personal intensity and professional vitality into her classrooms. Her leadership has been instrumental in developing the classical Studies Program in the College of HASS, where she teaches three of the history courses in the Classics Curriculum and many of the language classes necessary to complete the degree. She was instrumental in reviving the Greek and Roman history courses and took an active lead in developing Latin and Greek courses in the Department of Languages and Philosophy. Her dedication to the Writing Across the Curriculum policy is evident in the expanded syllabi. Professor Titchener's devotion to her students extends beyond the classroom. She is a faculty advisor to the History honorary society, serves as a member of the state Rhodes Scholarship selection committee and has been a leader in introducing the HASS Teaching Fellows Program.

College of Natural Resources

Chris A. Call

joined the faculty of Utah State University in 1987. Dr. Call is totally committed to the students of USU. Excellence in teaching requires extensive background knowledge, clear organization, effective presentation, and the sincere desire to see students learn. Chris personifies all of these concepts. He has been instrumental in developing many new and innovative programs for the College of Natural Resources. For example, he wrote and implemented the prestigious Fund for the Improvement of Postsecondary Education (FIPSE) grant from the U.S. Department of Education to develop a study abroad program for undergraduate students in the College of Natural Resources at USU. The program exposes students to the culture and natural resources management environment of nations such as Mexico, Iceland, and Morocco. Chris exemplifies the notion of the complete professor. He has mastery in his subject area in addition to being an excellent lecturer, a caring and compassionate person, and an individual vitally concerned with and involved in education in the broadest sense.

College of Science

James P. Evans

has been a faculty member of the Department of Geology since 1986. He is recognized as a tireless, dedicated teacher committed to excellence in the classroom. He successfully draws students beyond the mere descriptive and gets them to think critically about geologic processes and problems. In the words of one of his students: "He is unparalleled in his ability to inspire and cultivate genuine thinking among his students . . . he acts as a leader of a group rather than as a lecturer to the class." Consequently, he has the ability to present extremely difficult material in a readily understandable manner. He helped create and continues to coordinate geology summer field camps, one of the most efficient and successful geology field camps in the intermountain west. He teaches for the Honors program, initiated honors sections for geology, and helps coordinate the interdisciplinary, NASA-supported Earth Systems Science Project. Jim completed his BS degree in geology and engineering at the University of Michigan and his MS and PhD in geology at Texas A&M University.

Alma Mater Hymn

COMPOSED BY THEODORE M. BURTON

Across the quad at eventide the shadows softly fall,

The tower of Old Main appears and peace rests over
all.

The lighted "A" upon the hill stands out against the
blue;

Oh, Alma Mater, Utah State, my heart sings out to
you.

And through the years as time rolls on and student
friendships grow,

We'll ne'er forget the joys we had, those days we used
to know,

Thy mem'ries ever will be new, thy friends be ever
true.

Oh, Alma Mater, Utah State, my heart sings out to
you.
